AXUDAR GROUP™

Website QA – Outstanding Developer Actions

FINAL ACTION LIST • 03 OCTOBER 2026

IMPORTANT – THESE ARE NOT NEW CHANGE REQUESTS

A number of the items below have remained unchanged for over a month and the same corrections were included in the previous two QA/change documents. This document is deliberately simplified so there is no ambiguity. Please complete every OPEN item before the site is returned for another QA check.

Developer instruction: Fix the item exactly as written in the "Required fix" column. Mark DONE only after testing it on desktop and mobile.

CRITICAL	HIGH	MEDIUM	PASSED / IMPROVED
5	16	8	6

1. CRITICAL – FIX BEFORE ANY FURTHER QA

These items break the customer journey or can create the wrong sales enquiry.

ID	Issue	Current problem	Required fix	Done
C1	**SEO enquiry carries the wrong package**	Selecting SEO & AI Visibility at FROM £649 + VAT opens an enquiry showing Social Media Growth £399.	SEO must carry SEO & AI Visibility and £649 through every enquiry step. Test homepage → package → enquiry and SEO detail page → enquiry.	☐
C2	**Main "BUILD YOUR GROWTH CANVAS" CTA is wrong**	The header CTA routes to Contact instead of starting/opening the Growth Canvas.	Route this CTA directly to the Growth Canvas journey. It must not behave like Contact.	☐
C3	**Service pages contain copied Business Growth content**	Strategy, Marketing, SEO, Social Media and Website & Conversion are still using Business Growth copy/deliverables.	Replace each page with its own approved service-specific hero copy, outcomes, deliverables and CTAs. No duplicated Business Growth content.	☐
C4	**Core journeys are not separate as requested**	Ecosystem, Growth Canvas and How It Works still resolve into / depend on homepage sections instead of clear standalone journeys.	Create the agreed distinct routes/pages and ensure top navigation opens the correct page/route for each.	☐
C5	**Canvas → enquiry handoff is not fully reliable/clear**	The Canvas can hold selections, but the customer journey into enquiry is not clearly carrying and displaying all chosen areas/outcomes.	When "Discuss My Canvas" is used, show the selected Canvas areas/outcomes clearly on the enquiry screen and include them in the submitted enquiry.	☐

2. HIGH PRIORITY – PREVIOUSLY REQUESTED

These affect proposition accuracy, customer understanding, content quality or navigation.

ID	Issue	Current problem	Required fix	Done
H1	**Contact form categories do not match the six Growth Areas**	Contact currently uses Strategy & Planning / Commercial Growth / SEO & AI Visibility / Social & Content / Website & Conversion / Campaigns & Leads.	Use exactly: Business Growth; Strategy; Marketing; SEO & AI Visibility; Social Media; Website & Conversion.	☐

H2	**“Strategy & Planning” still appears**	Legacy wording remains across pages, Canvas and footer.	Replace all customer-facing “Strategy & Planning” references with “Strategy”.	☐
H3	**“Connected Growth Solutions” wording is wrong**	Homepage still uses “6 Connected Growth Solutions”.	Change to “6 Connected Growth Areas”.	☐
H4	**Growth Engine wording remains**	Legacy “Growth Engine” wording is still visible.	Remove legacy Growth Engine wording and use the new Growth Ecosystem / Growth Canvas terminology only.	☐
H5	**12-month wording remains**	“12 Month Partnership Model” and 12-month minimum wording are still visible.	Remove the legacy 12-month partnership/minimum wording where previously requested.	☐
H6	**SEO package detail page is incomplete/wrong**	The SEO detail page contains Business Growth/sales/pricing copy instead of full SEO content.	Build the SEO page with the approved SEO & AI Visibility package content, deliverables and FROM £649 + VAT pricing.	☐
H7	**“Ask a question” loses package context**	A package can be passed in the URL but the visible form does not clearly show the customer what package they are asking about.	Display the selected package name clearly on the form and include it in the submitted enquiry.	☐
H8	**Enquiry CTA wording is still old**	Contact still uses “PREPARE MY ENQUIRY”.	Use the agreed send wording: “SEND MY ENQUIRY” and, for Canvas-led enquiries, “SEND MY GROWTH CANVAS”.	☐
H9	**Submission confirmation must be clear**	The final success state is not aligned to the requested messaging.	After successful submission show a clear confirmation headed “WE’VE GOT YOUR ENQUIRY”.	☐
H10	**Canvas pages are too isolated**	/area/ pages do not present the normal site navigation/header clearly enough.	Maintain standard site navigation/back route so users never feel trapped in the Canvas journey.	☐
H11	**Service-to-service navigation is missing**	The requested Previous / All / Next navigation is not clearly present on service pages.	Add Previous / All Services / Next navigation consistently to all six service pages.	☐
H12	**Process terminology/numbering inconsistent**	Process still starts with Strategy & Planning and numbering changes from 1,2,3 to 04.	Use current terminology and one numbering format throughout.	☐
H13	**Duplicate testimonial content remains**	James Whitfield / Meridian Capital Group is repeated multiple times.	Remove duplicate/placeholder testimonials. Use only approved real testimonial content.	☐
H14	**Unrelated fundraiser FAQ remains**	“How long does a fundraiser run?” is still visible.	Remove the unrelated fundraiser FAQ completely.	☐
H15	**Old US address remains**	10808 Foothill Blvd, Rancho Cucamonga, CA is still visible in the footer/site.	Remove the US address and replace with the approved Axudar contact details only.	☐
H16	**Footer structure is wrong**	Contact details sit under a “LEADERSHIP” heading and old taxonomy remains.	Rebuild footer labels so Contact details, navigation and six Growth Areas are correctly named and grouped.	☐

3. MEDIUM / TECHNICAL CLEAN-UP

These should be completed before final production launch and SEO sign-off.

ID	Issue	Current problem	Required fix	Done
M1	**Results page structure differs from agreed format**	The page uses Problem → Growth Canvas Plan → What Axudar Did → Result.	Use the requested structure: Challenge → Canvas → Delivery → Result, unless explicitly re-approved.	☐
M2	**Results messaging conflicts with disclaimer**	“Real businesses. Real outcomes.” appears alongside wording that names/data may be indicative.	Make claims/disclaimer consistent and unambiguous.	☐

M3	**Insight page titles are generic**	Individual Insights are using the generic Axudar page title.	Give every Insight article its own SEO title and description.	☐
M4	**Service page SEO titles contain duplication**	Examples contain “Axudar Group | Axudar Group”.	Use a single, unique page title per service. Remove duplicate brand text.	☐
M5	**Contact page SEO title is generic**	Contact uses the generic site title.	Use a unique Contact page title/meta description.	☐
M6	**Legal/privacy destinations are not surfaced**	Privacy, Cookies and Terms are not clearly surfaced in the footer/contact flow.	Add Privacy Policy, Cookie Policy and Terms links and a privacy acknowledgement around data submission as appropriate.	☐
M7	**SEO Dictionary cannot be found**	The previously requested SEO Dictionary/unique topic structure is not visible in the current public journey.	Add/restore the approved SEO Dictionary content and ensure it is reachable from the intended location.	☐
M8	**Legacy route naming remains**	Package URLs still expose /readyMadePackageDetails/.	Rename/redirect legacy “Ready Made” routes where feasible so the public architecture matches the new proposition.	☐

4. PASSED / IMPROVED SINCE EARLIER BUILDS

Do not regress these items while fixing the outstanding work.

ID	Item	Status
P1	Six “Choose Where You Need Support” cards link to service areas	**PASS / IMPROVED**
P2	Six “+ Add to My Growth Canvas” links now pre-load Canvas areas	**PASS / IMPROVED**
P3	Headline Social Media price shows FROM £399 + VAT	**PASS**
P4	Headline SEO & AI Visibility price shows FROM £649 + VAT	**PASS**
P5	Insights landing page and checked articles open	**PASS**
P6	Main phone number displays as 0330 133 5720	**PASS**

5. RETURN-FOR-QA CHECKLIST

Please do not send the build back for checking until every box below has been completed by the developer.

- ☐ All C1–C5 critical items completed and tested.
- ☐ All H1–H16 high-priority items completed.
- ☐ Every top-navigation link checked on desktop and mobile.
- ☐ Every clickable service card/box checked on desktop and mobile.
- ☐ Every “Add to My Growth Canvas” action checked.
- ☐ Every package CTA checked through to the final enquiry screen.
- ☐ All form fields, validation, submit action and confirmation state tested.
- ☐ Correct package/service name and price retained throughout the journey.
- ☐ No old terminology remains: Strategy & Planning / Growth Engine / Ready Made / 12 Month Partnership Model.
- ☐ No placeholder, duplicated or unrelated content remains.
- ☐ Footer, contact details and legal links checked on every template.
- ☐ Page titles/meta checked for homepage, six services, packages, Results, Insights articles and Contact.
- ☐ Final mobile check completed at common phone widths before resubmission.

FINAL REQUIREMENT

Please return the build for QA only when every OPEN item in this document has been completed. If an item cannot be completed, flag the exact ID and reason before returning the site.
